

Sample Newsletter Article

When seniors and others going through difficult life situations reduce or stop driving, they are in the position of relying on other sources of transportation to meet their mobility needs. This may include receiving rides from family and friends that live close-by and are available. Unfortunately, appropriate transportation options are not always easy for them to obtain or afford. When this occurs, one of two options is likely: less than safe senior drivers continue to drive their cars or they face problems getting where they need to go and become isolated. In an effort to increase the availability of transportation, we are now offering volunteer transportation services. Might this program help you or someone you know? This program is being provided through a partnership with _____ (Sponsoring/ Training Organization), and _____ (Your Congregation). The goal of the project is to provide safe transportation for those in need to help maintain their independence and involvement in our community. If you are interested in either volunteering for this program or receiving rides from this program, please contact _____ at _____.
